## **Statement by Governor Jan Brewer**

PHOENIX – “The amnesty memo obtained by US Senator Grassley is very disturbing. I hope the Obama administration would first be exploring and implementing plans to secure our nation’s borders and put an end to the daily operations of narco-terrorist groups in the United States. The accumulated impact of years of federal failure needs to stop. It is clear that Americans want the border secure first, and unilaterally granting amnesty only encourages additional lawlessness.”
